FP&A & Corporate Finance Executive | Manufacturing & Supply Chain

Finance leader with proven ability to drive financial performance across \$200M+ operations. 11 years driving margin expansion, cost optimization, and strategic planning across manufacturing, supply chain, and operations. Delivered \$100M+ in cumulative cost improvements and margin gains. US Citizen.

Professional Experience

TWIST BIOSCIENCE

Wilsonville, Oregon

Senior Manager, Manufacturing & Operations Finance

2024 – Present

Senior finance leader partnering with the SVP & GM of Operations and Biopharma. Direct P&L ownership of \$180M operating budget across Manufacturing, Operations, Supply Chain, Quality, and Biopharma functions. Managed corporate gross margin forecast including materials, headcount, services, and depreciation.

- Delivered \$8M (+200 bps) gross margin improvement in FY2025 by leading cost and process improvement programs
- Architected enterprise-wide CapEx planning process, enabling strategic investment prioritization
- Transformed quarterly/annual gross margin forecasting process supporting ELT and Board of Directors reporting
- Enabled real-time executive budget review by rolling out automated variance reporting
- Finance systems: OneStream, SAP, Snowflake, Tableau

INTEL CORPORATION

Hillsboro, Oregon

Manager, Supply Chain Finance

2022 – 2024

Strategic partner to the VP & GM of the Global Materials Organization. Directly managed team of 4 senior finance analysts supporting 100+ cross-functional stakeholders. Led finance activities for organization managing \$5B in annual supplier spending, including ownership of \$20M operating budget, negotiation strategies, and product cost analysis.

- Coached analysts on best-in-class sourcing strategies to generate \$100M of cost improvements in FY2023
- Directed capacity expansion strategies totaling over \$1B within corporate CapEx and Free Cash Flow constraints
- Finance systems: SAP, Blue Yonder, Power BI, SQL Server

Senior Finance Specialist, Supply Chain Finance

2021 – 2022

Managed finance activities of the Fab Materials team, supporting \$3B in annual supplier spending. Developed cost and spending reports to influence strategic sourcing plans, unlocking \$30M of additional annual cost savings.

Supply Chain Program Manager, New Product Introductions

2017 – 2021

Managed supply chain and manufacturing activities for new product introductions, including advanced data center and specialty drone systems. Led program to enable chiplet binning in die-on-wafer assembly for data center products.

Supply Chain Engineer, Global Materials Organization

2015 – 2017

Managed procurement for \$60M in annual spending and improved related processes to reduce costs by \$6M per year
